Summer is nearly over! We'll help you get through the last weeks of warm weather with these energy tips.

- Only turn on lights you absolutely need! Lightbulbs, especially incandescent, give off heat that bring up the temperature of your home. When you're inside enjoying the air conditioning, turn off those unnecessary lights.
- Add fans, and keep your thermostat higher! Standing fans, and ceiling fans, will
 provide you a "wind chill" effect that makes you feel cooler. With a fan in place,
 you won't notice the higher internal temperature of your home. Just be sure to
 turn off fans when you're not in the room because they don't actually help to
 cool the room itself.
- Change those air filters! The cool air from your HVAC system won't be able to reach you if you have a filter that is clogged with dust and debris. Make sure you change your air filter monthly, or at least bimonthly, for optimal energy efficiency.
- Keep windows and doors tightly sealed! Leaving a door or window open while
 your air conditioner is on is like throwing away perfectly good money. Keep your
 home sealed tightly so cool air stays inside. Remember, heating and cooling costs
 oftentimes make up over 50% of your electric consumption!

Did you know that you can check your monthly and daily consumption through your online account?

Visit www.btutilities.com to set up an online profile today!

Even though summer might be coming to an end, the fun doesn't have to! Lake Bryan is the Brazos Valley's local recreation destination for activities no matter the weather. The more than 12 miles of hiking and biking trails that surround the lake are perfect for a stroll or a ride on a crisp fall day. Consult the map of trails, produced by the Brazos Valley Mountain Bike Association, to see if you would like to take a leisurely ride around the Peaceful Woods trail, or opt for something more adventurous on the Roller Coaster trail.

Fishing is another great activity for fall. The Texas Department of Parks and Wildlife regularly stocks Lake Bryan with game fish such as largemouth bass, crappie, catfish, sunfish, and red drum. Nearly 165,000 red drum were introduced to the lake in 2017. If you think you have caught the "big one," you can visit the Texas Department of Parks and Wildlife website to find records for fish caught on Lake Bryan, and submit your catch as well.

Look for details on upcoming events, including a fall family funfest that will be held at Lake Bryan in October.

For information on park fees, hours, and concerts, visit: www.lakebryan.com

GAMEDAY SHUTTLE DOWNTOWN BRYAN, TEXAS

COMING TO AGGIELAND FOR TEXAS A&M FOOTBALL?

Don't miss our live music, locally-owned venues, and free gameday shuttle to campus.

Park for free in historic Downtown Bryan just minutes from Texas A&M University then catch the free gameday shuttle to each home football game. Want covered parking? The Roy Kelly Parking Garage is available in Downtown Bryan for just \$10 a day. We've got everything you need to get ready for that big game and to celebrate after the victory.

CONSERVATION TIPS

Energy Conservation Tip:

Periodically inspect your dryer vent to ensure it is not blocked. This will save energy and may prevent a fire.

Water Conservation Tip:

Direct water from rain gutters and HVAC systems to water-loving plants in your landscape.
