LINEMAN APPRECIATION DAY

National Lineman Appreciation Day is April 18. We would like to take this opportunity to recognize our linemen who are the fearless faces of Bryan Texas Utilities. These unsung heroes take on the daunting task of maintaining 2,300 miles of overhead and underground power lines that serve approximately 59,000 customers within our service territory.

Being a lineman takes mental and physical strength, and the job does not end when the sun sets. Our linemen are often called unexpectedly during the night and may be required to work in extreme conditions such as high wind, rain, sweltering heat, frigid cold and occasionally, snow. Major holidays do not delay the job for linemen either. No matter the day or condition, they work to assure the customer has power for heating on cold nights, for air conditioning during hot summer days, and for cooking so food is on the table.

Safety is a lineman's first priority; for themselves, their crew, and the public. Working with electricity can be hazardous so linemen are well-trained. The adverse locations they oftentimes work in adds another level of intensity. They work closely together and watch out for one another no matter the location or conditions they face. We want to thank our linemen for their commitment to safety, reliability, and BTU customers on April 18, and always.

FREE EVENT

SPRING INTO SUMMER

CONSERVATION TIPS

Energy Conservation Tip:

Install efficient lighting that runs cooler. Only about 10% to 15% of the electricity that incandescent lights consume results in light—the rest is turned into heat.

Water Conservation Tip:

Use garbage disposals sparingly! Scrape your dishes instead of rinsing them into the disposal as they can waste water unnecessarily.
