## May | National Electrical Safety Month

May is National Electrical Safety Month. While safety is a top priority year-round, Electrical Safety Month is a time to acknowledge the importance of safety vigilance. This year we're focusing on electrical safety in the home. Electricity causes more than 140,000 fires each year, resulting in more than 500 deaths, 4,000 injuries, and \$1.6 billion in property damage according to Electrical Safety Foundation International. There are many measures you can take to ensure the safety of your loved ones.

### In the Kitchen

- Vacuum your refrigerator coils every three months to eliminate dirt buildup that can reduce efficiency and create fire hazards.
- Ensure all countertop appliances are away from the sink.
- All appliance cords should be away from hot surfaces. Pay particular attention to cords around toasters, ovens and ranges. Cords can be damaged by excess heat.
- The area above the cooking range should be free of combustibles, such as potholders and plastic utensils. Storing these items on or near the range may result in fires or burns.

### Light the Way to Safety

- The wattage of the lightbulbs you use in your home should match the wattage indicated on the light fixture. Overheated fixtures can lead to a fire.
- Check lamp cords to make sure they are in good condition—not damaged or cracked. Do not attempt to repair damaged cords yourself. Take any item with a damaged power cord to an authorized repair center.
- Extension cords should not be used to provide power on a long-term or permanent basis. Have additional electrical outlets installed by a professional to provide power where needed.

### Be Prepared

- Nearly two-thirds of fire deaths result from fires in homes without working smoke alarms. Smoke alarms should be located on every level of your home, inside each bedroom and outside each sleeping area.
- Test smoke alarms every month. Batteries should be replaced at least once a year—or sooner if indicated in the manufacturers' instructions. All smoke alarms should be replaced at least every 10 years.
- Talk to your family about an emergency plan in the event of a fire in your home. If you have small children, include them in planning an emergency escape route; they are more likely to remember the plan if they're involved in its creation.

CITY OF BRYAN PARKS & RECREATION  
**AQUATICS**

**BRYAN AQUATIC CENTER**

**HENDERSON HARBOR**

**SADIE THOMAS POOL**

To learn more about pools, visit:  
[bryanparksandrecreation.com](http://bryanparksandrecreation.com)

2 hours for 101 - 200	\$275	\$330
Each additional hour	\$110	\$132

## CONSERVATION TIPS

### Energy Conservation Tip:

**Grill Outdoors.** Instead of cooking on an indoor range, go outside, and use an outdoor grill to keep the heat out of your home on warmer days.

### Water Conservation Tip:

You can discover whether your home has leaks by checking your water meter before and after a two-hour period when no water is used. If the meter changes at all, you may have a leak!
